Ayush Gaurkar

Pune, 411048 | +919673665513 | ayushgaurkar001@gmail.com

Summary

Computer Engineering student skilled in Python, SQL, Data Analysis, and AWS Cloud Services. Experienced in machine learning and data analytics projects, with a strong foundation in data processing, visualization, and predictive modeling. Seeking opportunities to apply technical and analytical skills in Data Engineering and Analytics roles.

Experience

Sales Data Analysis

Analyzed sales data using Python and SQL to find trends, understand customer behavior and visualize key sales metrics through an interactive dashboard for better decision-making.

Github: SalesDataAnalysis?

Binance Futures Test Net

Developed a Python trading bot that interacts with the Binance Futures Testnet API to execute orders, validate user inputs, handle errors, and maintain logs through a command-line interface.

Github: Binance-futures-trading-bot

Education

B.Tech in Computer Engineering | Aug 2024 — Jun 2027

Vishwakarma University, Pune

CGPA: 7.6

Publications and Presentations: Machine Learning Based Cab Fare Prediction

Skills

- HTML
- CSS
- Python
- SQL
- AWS Cloud Services

Courses Completed

UDEMY Full Stack Web development

Nasscom Data Processing and Visualisation

Introduction to Cloud Computing

IBM Introduction to Software Engineering

Full Stack Software Developer Assessment
